

**HOMEWORK AND QUIZZES:** Homework will be collected daily. **Late homework will not be accepted.** Only your instructor can excuse homework.

There will be a weekly, online quiz and a weekly, in-class quiz. **No make-up quizzes will be given.** Only the course coordinator can excuse an online quiz, and only your instructor can excuse an in-class quiz.

**EXAMS** There are two in-class midterm exams, one evening midterm exam and a final exam. The two in-class midterm exams are written and graded by your instructor, with partial credit being possible. The evening midterm exam is a course-wide, multiple-choice, machine-graded exam written by the course coordinator. The final exam is a course-wide, 25-question, multiple-choice, machine-graded exam, also written by the course coordinator.

The dates of the midterm exams are as follows. (**Mark them on your calendar.**)

EXAM 1: in class exam on February 3.

EXAM 2: evening exam on March 2 at 8:30 p.m. (Room to be announced.)

EXAM 3: in class exam on April 10.

If you miss exam 1 or exam 3, contact your instructor immediately to explain your absence. You should be prepared to present any documentation about your absence to your instructor. Only your instructor can give you permission to take a makeup exam 1 or exam 3.

If you miss exam 2, you must contact the course coordinator (Devi Nichols, MATH 902, 494-1950) immediately to explain your absence. Without a documentable personal illness or family emergency, you will only be allowed to take a makeup exam with a 30 point penalty on the exam. Only the course coordinator can give you permission to take a makeup exam 2.

If you miss the final exam and have documentation of a serious personal illness or family emergency, contact your instructor immediately. All other requests must be made to the course coordinator, and a 30 point penalty may apply.

**GRADES:** There is a total of 550 points in the course. Homework and quizzes combined count 100 points. Each of the three mid-term exams counts 100 points, and the final exam counts 150 points. Since the only assessments common to all students and graded identically for all students are the two, course-wide exams (Exam 2 and the Final Exam), a normalization process based on them is used to determine the **number** of each letter grade given in a section. The Department decides on an A-range, B-range, C-range, etc., for the combined two exams. Each instructor then gives the same number of A's, B's, C's, etc., that his section earned on the combined exams. The assignment of the letter grades is based on students' **total points** (a number between 0 and 550). For example, if in a particular section there are 8 A's, 10 B's, etc., on the two combined exams, the 8 students with the highest **total points** receive an A, the next 10 a B, and so on.

**ACADEMIC ADJUSTMENTS:** Students who have been certified by the Office of the Dean of Students-Adaptive Programs as eligible for **academic adjustments** should go to MATH 909 and request an *Information Sheet* for **this** semester, that explains how to proceed this semester to get these adjustments made in Mathematics courses. It is not the same as last semester. **This should be done during the first week of classes.** Only students who have been certified by the ODOS-Adaptive Programs and who have requested ODOS to send their certification letter to their instructor are eligible for academic adjustments. Students who are currently undergoing an evaluation process to determine whether they are eligible for academic adjustments, are encouraged to find out **now** what procedures they will have to follow when they are certified, by requesting the above mentioned Information Sheet from MATH 909. Large print versions of the Information Sheet are available in MATH 909 upon request.

**OFFICE HOURS:** Instructors have common office hours. **Any student can get help from any of the instructors during their common office hours.** After the first week of classes, the common office hour schedule is posted on each instructor's door and on the course web page. You are strongly urged to go to someone's office hours if you have questions. It is the best way to get individual help.

**SECTION CHANGES AND DROPS:** There are no section changes allowed during the first week of classes. After that, until the end of the 9th week of the semester, see the instructor of the section you want to enter. The schedule of classes can be found on the Mathematics Department web page or at the main desk in MATH 835. If you want to drop a course during the first nine weeks of the semester, your instructor can sign your drop form. If your instructor is not available, go to MATH 835. **No section changes or drops are allowed after the first nine weeks of the semester.**
