

MA 15300 Fall 2013 Assignment Sheet

All homework assignments will be completed online using the computerized homework system WebAssign. To get started with WebAssign, visit the [course website](#) and use the [WebAssign Intro link](#) under “Online Homework”.

The problems listed below are all from the textbook; **you are not required to submit these problems on paper.** Similar problems will make up the WebAssign homework assignments.

Students are discouraged from using anything other than a [TI-30Xa scientific calculator](#) when completing the homework assignments, since that is the only type of calculator allowed for quizzes and exams. **Again, the TI-30Xa scientific calculator is the ONLY calculator allowed on quizzes and exams.**

The recommended web browser when using WebAssign is Mozilla Firefox. Technical problems have been reported in the past with Internet Explorer, Google Chrome, and Safari. **It is highly recommended that you use Mozilla Firefox when working on WebAssign.**

Be sure to check the [Homework Hints](#) and [Calculator Tips](#) documents on the [course website](#) under “Online Homework” for tips on using WebAssign and the TI-30XA calculator.
